Texas Network of Youth Services Recognizes THRU Project

We are proud to announce that THRU Project has been honored by the **Texas Network of Youth Services (TNOYS)** with the **Steve Wick Innovative Program Award** at their annual conference. This recognition is bestowed upon organizations that introduce new, expanded, or innovative programs, making significant contributions to the field of youth services in the state or across the nation.

We also had the chance to be presenters at the 40th Annual TNOYS conference, Unearth Your Brilliance. Our staff spoke about THRU Project's programs and how we've been able to bridge gaps for youth as they enter adulthood. We are so grateful for the opportunity to speak with and learn from other child welfare professionals.

Watch Us At Your Local Santikos Theater!

THRU Project was chosen to be featured in a video at **Santikos** movie theaters, which plays before every movie throughout the summer. This amazing opportunity will help bring awareness to the barriers youth with lived experience face, and what THRU Project is doing to bridge the gaps.

Our youth and staff got to see the video for the first time at our June life skills event, which took place at Santikos Northwest and featured the **San Antonio Apartment Association (SAAA)**. SAAA spoke to our youth and mentors about things to know when leasing an apartment. After the presentation we watched our video on the big screen before enjoying the new Transformers movie.

Thank you to Santikos for highlighting our organization!

It's Like Blood Sugar...

Our bodies work best when we have steady blood sugar throughout the day. This is also true for THRU Project!

- Monthly donations keep our fundraising budget from looking like a mountain range and more like a steady, even line, the same way we like our blood sugar.
- Having regular, reliable contributions coming into the organization each month allows us to do a better job of budgeting for our program services.
- **Monthly Giving Champions** make it possible for THRU Project more accurately project how much we can grow in the future!
